

GEORGIA *Express Lanes* I-285 Eastside

Exhibit A

GDOT is studying the feasibility of an access point at Northlake Parkway as requested by the City of Tucker, Northlake-Tucker CID, and DeKalb County. Options under study for the existing Northlake Parkway interchange are shown below.

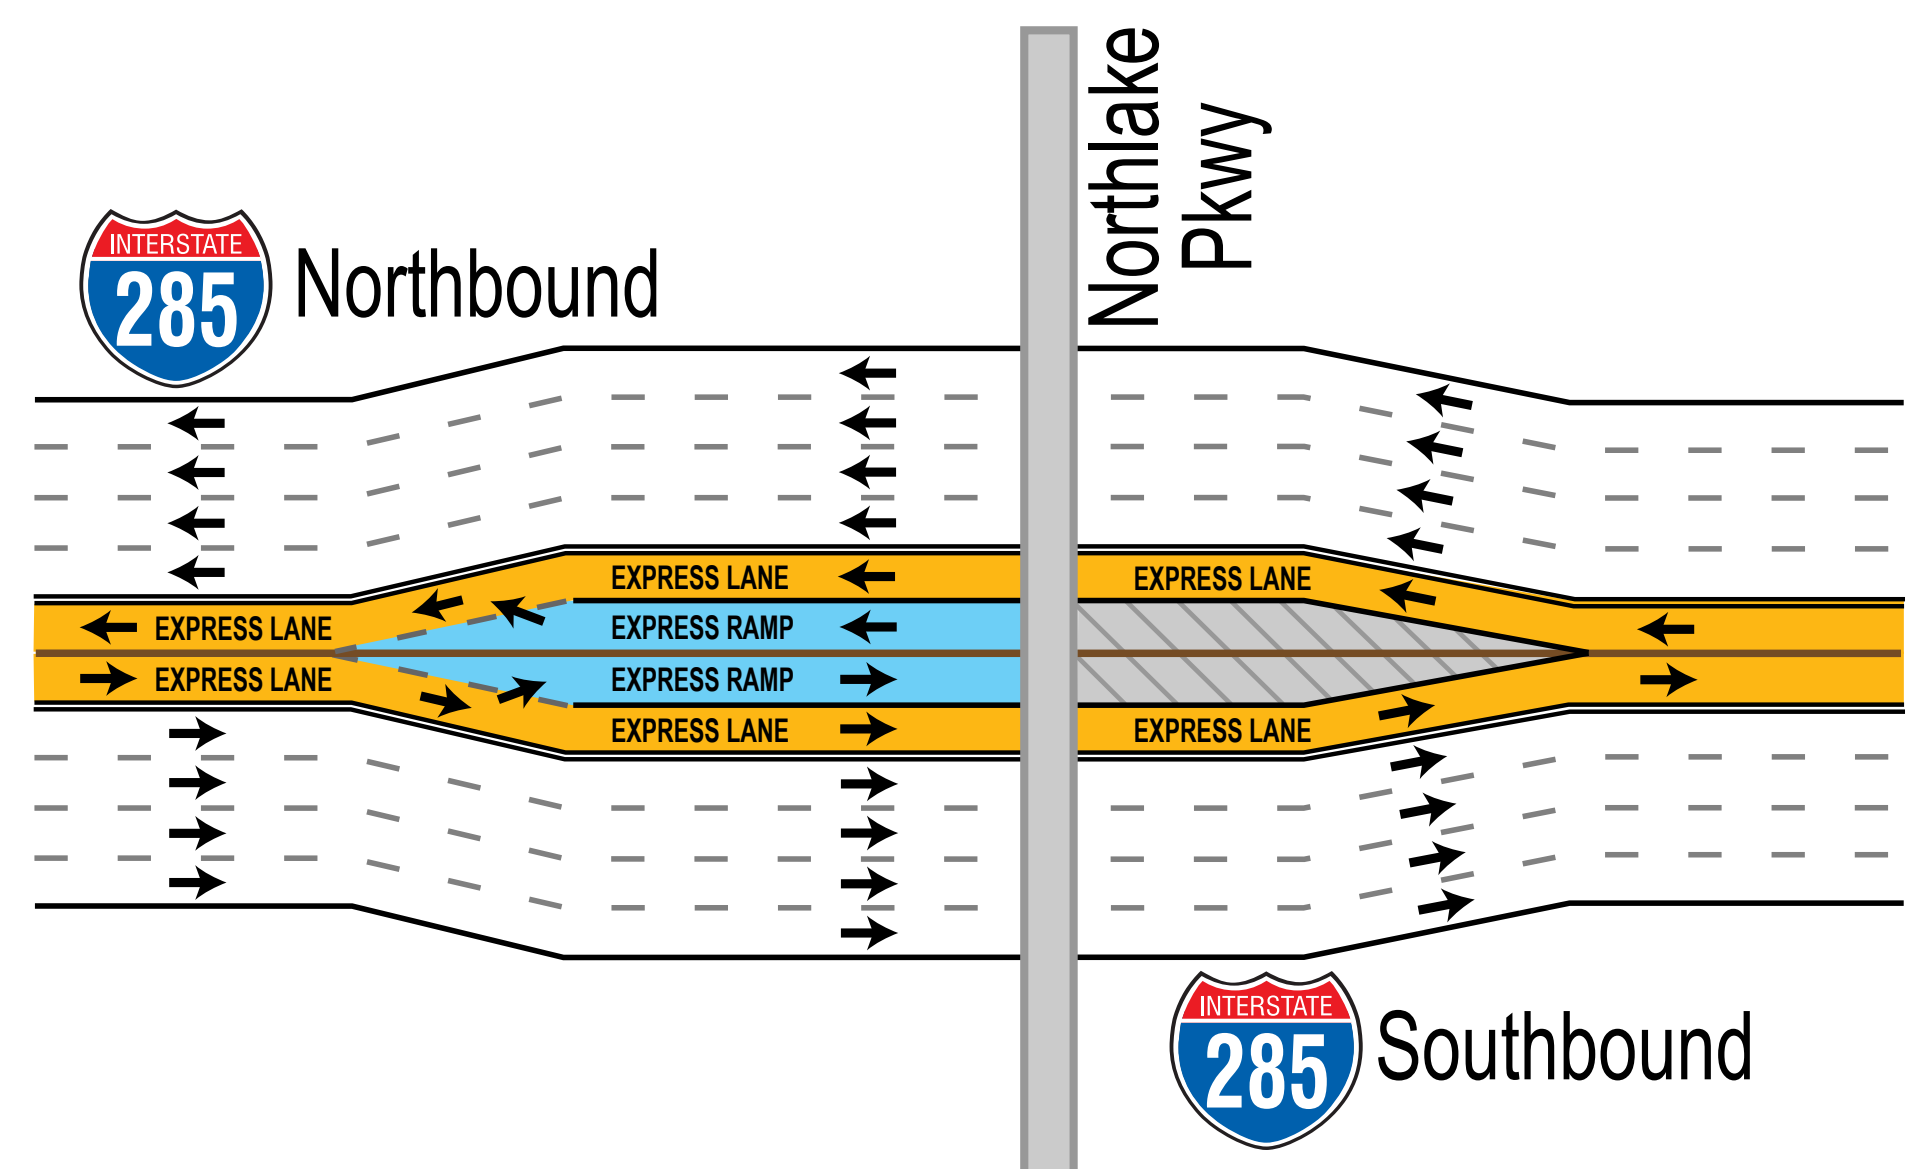

1. No Change

- Adds one express lane in each direction to inside of I-285
- Existing general purpose ramps to Northlake Parkway remain
- Does not provide direct access to Tucker from the proposed express lanes

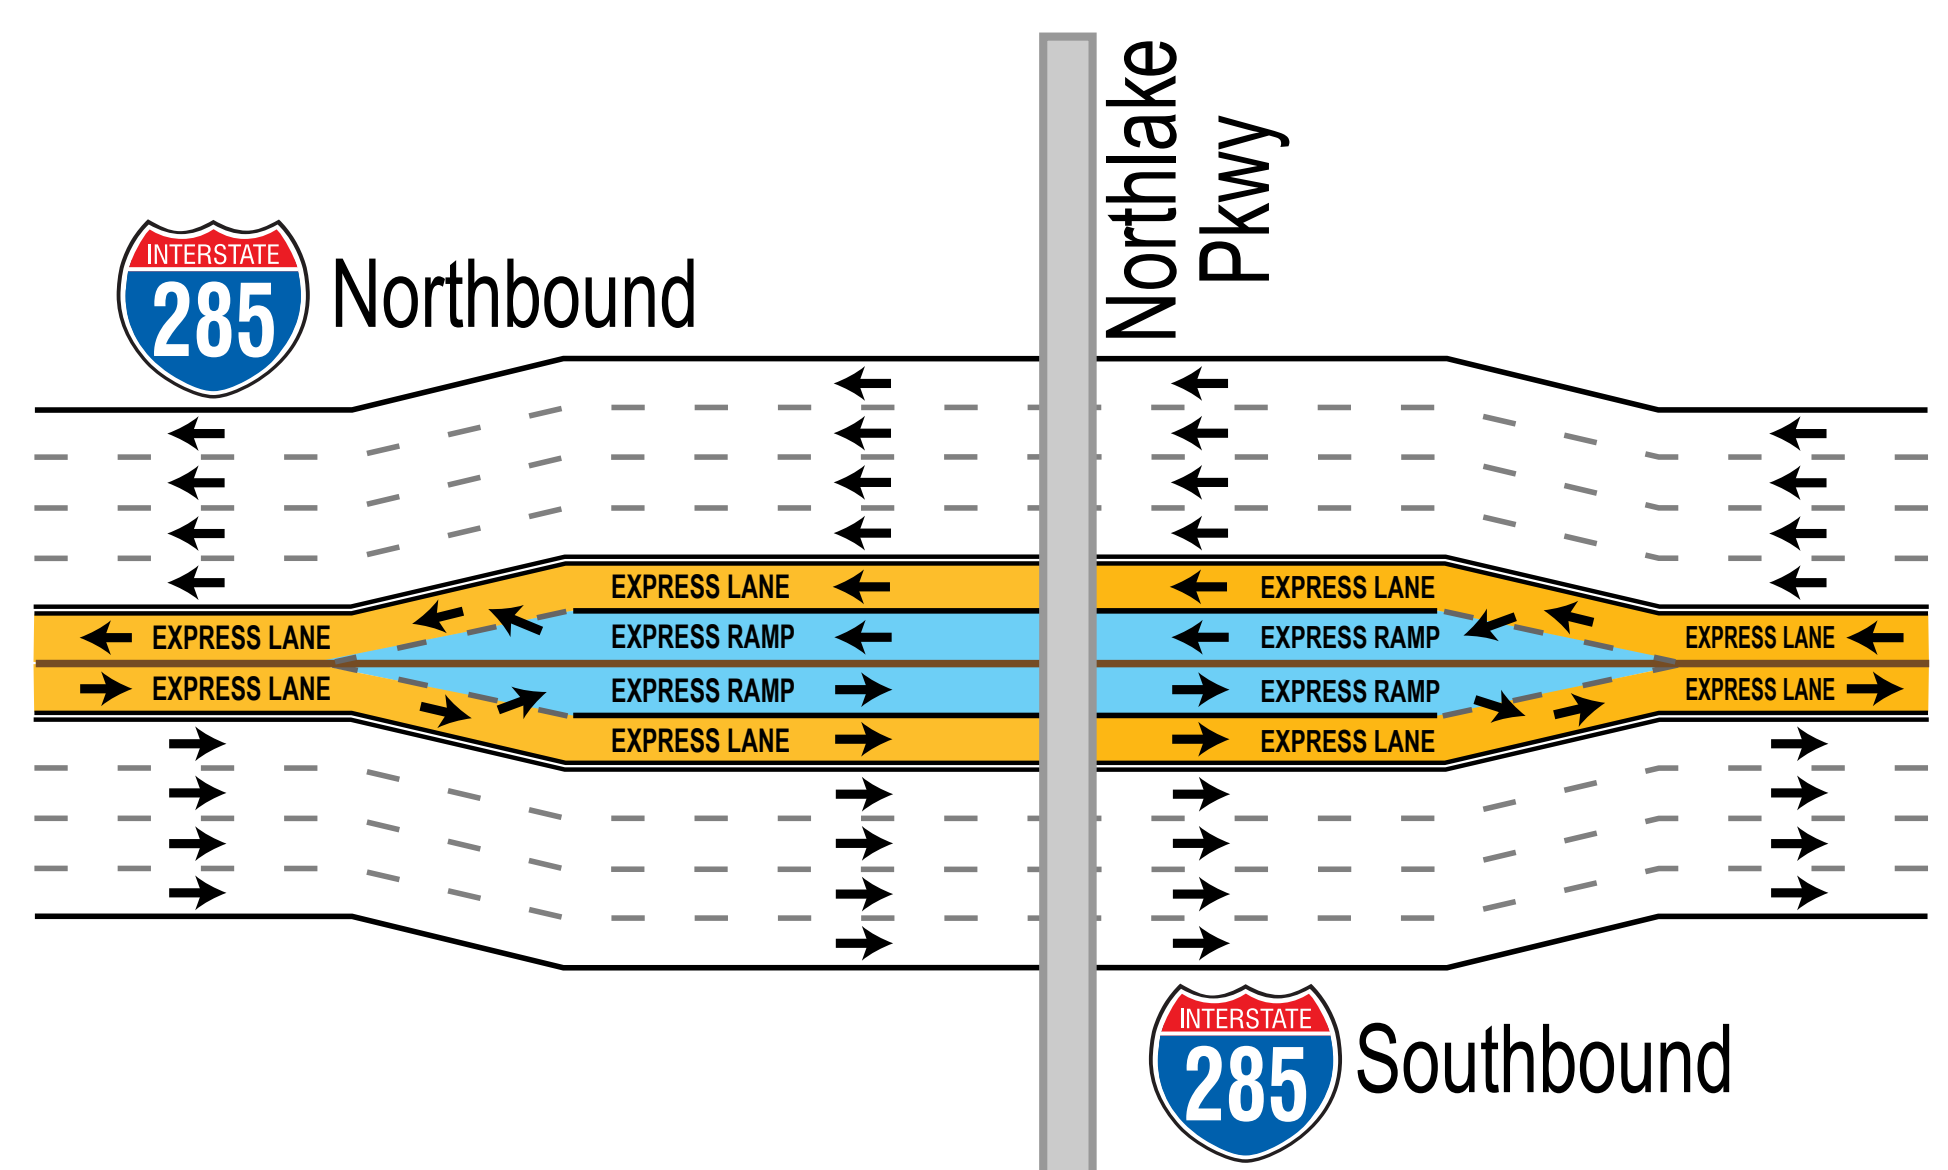

2. North Facing Express Lane Access

- Adds one express lane in each direction to inside of I-285
- Removes existing general purpose ramps to Northlake Parkway
- General purpose traffic would utilize exit/entrance ramps at Lavista Road to access this area
- Adds express lane only ramps from I-285 SB to Northlake Parkway and from Northlake Parkway to I-285 NB

3. Full Express Lane Access

- Adds one express lane in each direction to inside of I-285
- Removes existing general purpose ramps to Northlake Parkway
- General purpose traffic would utilize exit/entrance ramps at Lavista Road to access this area
- Adds full express lane only interchange at Northlake Parkway
- Would require additional right-of-way
